

Automatic Scrubbers

Our one of a kind, top-of-the-line family of auto scrubbers

Media 26B Plus

For cleaning and maintenance of medium to large premises Media 26 and 32 will provide reliable, user-friendly, low cost operation. With unsurpassed quiet, maneuverable handling, one pass is all you will need to scrub and dry any type of surface.

- Machines are self propelled and variable speed in both forward and reverse.
- Powerful independent brush and drive motors.
- Insulated vac motor increases quiet operation (68db)
- Metal brush housing.
- Solution and brush control has an automatically shut off when in neutral.
- Large capacity solution tank refilled via the easy to access filling inlet with a self-closing opening.
- Surface drying is maximized with a stainless steel "V" squeegee assembly that hugs the floor even in the tightest turns.
- Gaining access to the battery and electrical compartment is aided by a gas lift and the balanced position of the rotationally molded recovery tank.
