

Lift your washroom to a new level with stylish, functional dispensers.

**Tork® Elevation™
dispensing solutions**

Lift your washroom with Tork Elevation

Tork is proud to introduce a new line of global dispensers. Tork has listened to your ideas and taken the next step to invest in our brand by developing a new and innovative global dispenser line that provides improved functionality, simplifying daily use. Available in black and white, our selection of dispensers offers a wide range of features that ensure the perfect solution for your washroom needs. That's what we call functional design.

All of the new Tork Elevation dispensers are especially designed for a wide variety of public washroom environments – around the world. We accomplished this with design elements that are simple, organic, soft and neutral. Together, they create smooth and seamless dispensers that provide a clean and efficient feeling.

Although the exterior design plays an important role in public washrooms, the new design is very much focused on functionality. The dispensers are a unique combination of design and functionality that can **lift washrooms to a new level.**

Tork Elevation dispensers have already received accolades from top design critics.

iF Design Award – The iF product design award represents an annual distinction for products that succeed especially well in combining functionality with convenience, aesthetics and innovation.

Red Dot Design Award – Each year an international panel reviews and evaluates the submitted products according to criteria such as degree of innovation, functionality and formal quality, establishing this award as the largest and most renowned design competition in the world.

Lift your washroom with innovation

Design and functionality go hand in hand with Tork Elevation dispensers. This unique combination ensures that our dispensers are easy-to-use for both washroom visitors and maintenance staff. A great deal of thought has gone into every detail to deliver a best-in-class dispenser line.

Stay in touch

Dispensers have a business card holder for displaying relevant contact information.

Easy to mount

Dispenser contains a small leveling device to help with correct installation.

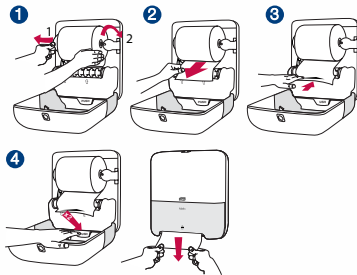

H1 Tork Matic

Rapid refilling

For easy refilling and less maintenance time:

- 1 Click in the hand towel roll
- 2 Pull the end of the paper down to the arrows
- 3 Feed the paper around the spindle
- 4 Push the paper lever a few times. Close the hood. The dispenser is then ready for use.

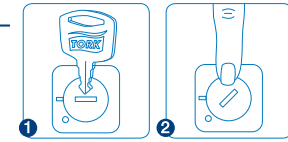

Controlled consumption

An efficient cutting mechanism provides smooth, one-at-a-time dispensing, controlling consumption.

Push for paper

The hygienic push lever is only visible when refilling or when paper is not in reach. A simple push on the intuitive lever dispenses a new sheet of paper.

Two ways to open

The versatile locking mechanism found on most Tork Elevation dispensers works in locked mode or push mode. In the locked mode, the dispenser can only be opened with a key and is suitable for public environments. In the unlocked mode, the dispenser can be opened with a simple push on the lock and is ideal for areas where locking is unnecessary.

M2 Tork Centerfeed Pro

Pro feature

Adjustable for 1 ply or 2 ply Tork paper refills. The Pro feature provides controlled consumption, decreasing the cost per use. Presents a more open paper and eliminates roping.

T1 Tork Jumbo

Rapid refilling and extra capacity

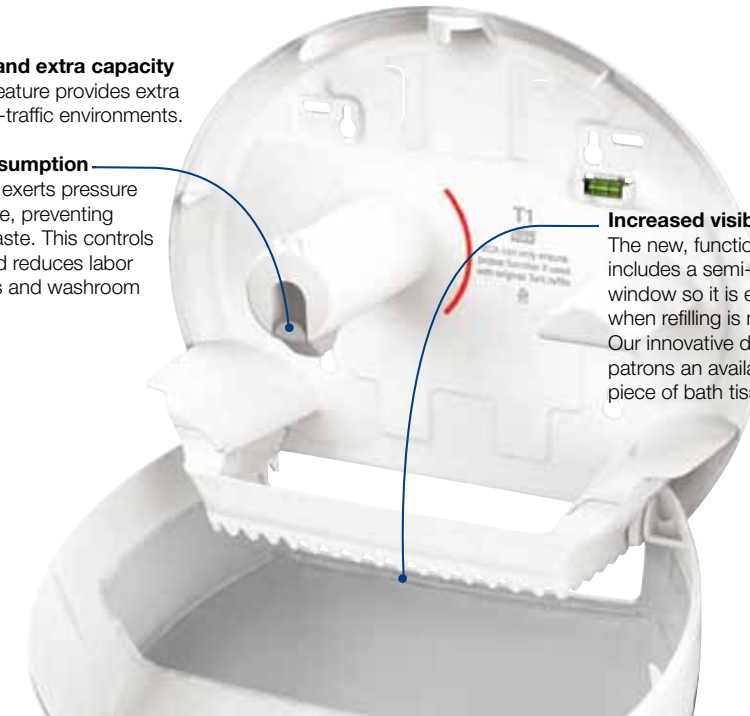

A new stub roll feature provides extra capacity for high-traffic environments.

Controlled consumption

Innovative brake exerts pressure on the tissue core, preventing over spin and waste. This controls consumption and reduces labor required for refills and washroom maintenance.

Increased visibility

The new, functional design includes a semi-transparent window so it is easy to see when refilling is necessary. Our innovative dispensing gives patrons an available and visible piece of bath tissue every time.

Lift your washroom with the right selection

A clean and well-managed washroom shows concern for your guests and employees. The right combination of dispensers and refills saves maintenance time, reduces waste and guarantees long-lasting performance. More importantly, it provides users with a clean and pleasant washroom experience.

Assessing your washroom

Choosing the right hygiene system for your washroom needs is easy. However, it is important to specify these needs from the very beginning. When assessing your washroom, the following four factors are important to consider.

1 Size

Is your washroom smaller and located in a restaurant, or is it a larger washroom located in an airport? A washroom's size affects which dispensers are most suitable, in turn affecting the capacity level.

2 Visitors

How often is your facility used and by how many people? Will your washroom be in continual use by a steady number of regular visitors, or will it be extremely busy at certain peak times? The number of visitors is important when choosing the proper size and capacity of a hygiene system.

3 Cleaning

How often will your facility be cleaned and how often will dispensers need to be refilled? A hygiene system's capacity should, at a minimum, match the number of visitors expected between each round of cleaning.

4 Paper quality

Your choice of paper quality is very important for hygiene, comfort and consumption control. The level of quality can also reflect upon your desired company image. Tork has three quality levels – Premium, Advanced and Universal.

Tork capacity symbols

After having assessed your washroom, you will have a good idea of what kind of capacity level and paper quality you require. Tork provides three symbols to help you choose the right capacity level and hygiene system.

Low Capacity

A solution that suits smaller washrooms with fewer visitors and regular cleaning.

Medium Capacity

A solution that fits larger washrooms with many visitors and longer maintenance cycles.

High Capacity

A solution that is the best choice for busy, large washrooms with a high volume of visitors.

Elevating solutions for every washroom

Commercial/Office – Low/Medium Capacity

A small office washroom usually has a low to medium number of visitors spread evenly throughout the day. The daily cleaning of a washroom signals that you care about, and pay attention to, details. It also shows a concern for your employees and your business' image.

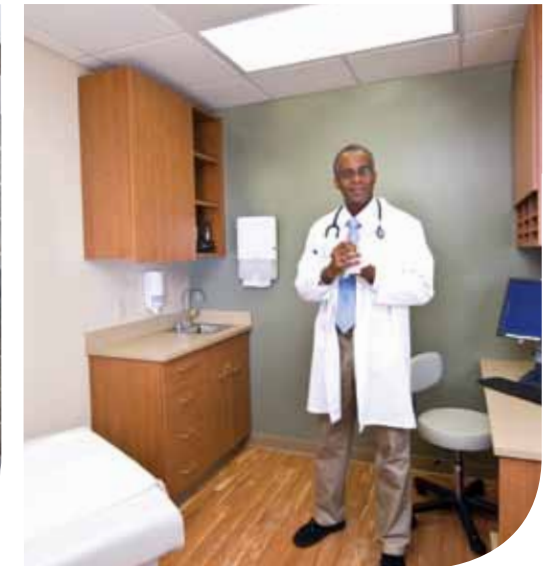

Recommended Tork dispenser systems:

- Tork Xpress Interfold Towel, H2 System
- High-Capacity Bath Tissue, T26 System
- Liquid Soap & Hand Sanitizer, S1 system
- Automatic or Manual Foam Soap & Hand Sanitizer, S22 & S21 System

For high demands on paper quality and performance, try our Premium assortment.

Lift your washroom to a higher level

Foodservice – Low/Medium Capacity

Cleanliness, hygiene and functionality in food preparation areas are extremely important. A neat and clean washroom also sets the stage for an establishment's image, as well as its perceived food quality.

Recommended Tork dispenser systems:

Back-of-House

- Tork Matic Roll Towel, H1 System
- Centerfeed Pro Hand Towel, M2 System
- Liquid Soap, S1 System
- Manual Foam Soap, S21 System

Front-of-House Washroom

- Tork Matic Roll Towel, H1 System
- High-Capacity Bath Tissue, T26 System
- Jumbo Roll Mini Twin Bath Tissue, T2 System
- Auto Foam Soap & Hand Sanitizer, S22 System
- Alcohol Gel Hand Sanitizer, S1 System

Education – High Capacity

School and university washrooms are visited by hundreds of students every day. Durable and lockable dispensers that hold large supplies of hand towels, bath tissue and soap are a must – as is the need for a low cost-in-use.

Recommended Tork dispenser systems:

- Tork Matic Roll Towel, H1 System
- Jumbo Roll Bath Tissue, T1 System
- Jumbo Roll Mini Twin Bath Tissue, T2 System
- Liquid Soap, S1 System
- Manual Foam Soap, S21 System

Hallways / Classrooms

- Manual Foam Hand Sanitizer, S21 System
- Alcohol Gel Hand Sanitizer, S1 System

Public Facilities – High Capacity

Large public facilities have hundreds of visitors travelling through the washrooms on a daily basis. Demanding environments require reliable systems that help maintain a high level of hygiene, regardless if they are in an airport or sports arena.

Recommended Tork dispenser systems:

- Tork Matic Roll Towel, H1 System
- Liquid Soap & Hand Sanitizer, S1 System
- Jumbo Roll Bath Tissue, T1 System
- Automatic or Manual Foam Soap & Hand Sanitizer, S22 & S21 System

Healthcare – Low/Medium Capacity

Within healthcare, hygienic solutions have to deliver on rigorous preventive standards. With a steady number of users over the course of the day, dispensers have to be easy-to-use. In addition, paper products should be soft, absorbent and gentle – for both healthcare staff and patients.

Recommended Tork dispenser systems:

Patient Room / Nurse Station

- Tork Xpress Interfold Towel, H2 System
- Liquid Soap & Hand Sanitizer, S1 System
- Automatic Foam Soap & Hand Sanitizer, S22 System

Public Washroom

- Tork Matic Roll Towel, H1 System
- High-Capacity Bath Tissue, T26 System
- Automatic Foam Soap & Hand Sanitizer, S22 System

Let's Talk Tork . . .

Reduce Cost. Stay Healthy. Save the Planet.

Our innovative processes and products help save you money. Guaranteed.

We guarantee you'll save up to 10% when you switch from folded towels to **TorkSelect** roll towels. With Tork solutions you'll reduce usage, maintenance and labor, and save on cost-in-use.

Ensure employees and patrons are healthier.

The consequences and costs of poor hygiene in the washroom just aren't worth the risk. Protect yourself from employee absenteeism, cross-contamination and foodborne illness with Tork hands-free towel dispensers and soap solutions.

Be good to the environment.

With Tork controlled consumption dispensers, you'll reduce usage and waste. By using 100% recycled, process chlorine free, and third-party certified Tork paper products you'll help save valuable natural resources.
